

A lot of comments on wanting to be happy. Does this mean they're currently unhappy? How can we help these students?

Station 8

What do you notice?
What do you wonder?

New Year Placemat
Activity (Family Teams)

Who is modelling language for them?

Increase in screen time?
Digital platforms?
Is this language "normalized"?

Notice

- many comments about using kinder words
- more kindness is a theme
- hallway behaviour is brought up often

How can they/we better utilize digital tools to improve social interactions & video role play, digital safety

notice
Students wanting to engage in new friendships, being responsible for their words + actions & understanding its effects on others

Wonder

How students (and if they are) are connecting w/ others outside of school and how this impacts their attitudes/behaviours in the classroom

Students wanting to hear kind words.

positive attitudes

Should we be posting examples of kind words/positive mindset?

How can we cultivate kindness and shift the language of "put downs" that we hear? ♥

Yes! Maybe update "STRIPES" language?
Do we need to bring back a common language of expectations? (K-7)

Work with a SLP on this topic.
explicit teaching of using language in different contexts

- Students wanting kindness/sharing in the peers ✓
- I wonder if this is tied to COVID and how we can promote further SEL and teaching students to interact with their peers in a respectful way

How much of these wants from students are stemming from family, society, cultural & media? (values, customs, habits, routines, parenting)

Yes! →

We still have some work to do in this area - developing positive social skills - it seems that there has been a shift backwards - possibly due to Covid Years/digital world? ♥

Wonder if building Social Skills should be a focus?
Lots of repetition of what teachers say!
