

Station 6

Lots of ELL students.

What do you notice?
What do you wonder?

ELL Assessment K to 7

How can we improve this?

Writing has the lowest ELL levels.

Most students have gone up 1 level (or more) in this school year ✓

There is fluctuation in ELL levels. how often is testing done?

ELL writing development is usually the last to develop (or develops later).
BICS & CALPS

social speaking skills will give more confidence for academic speaking. Every April ☺
Does more ~~make~~ speaking

Is it 'expected' that students go up a level every year?

I think "Academic" / content speaking is more helpful than social. opportunities help to improve other scores?

Pull out Writing group?
↳ to target Emergent writers

Should we focus more on supporting ORAL, OR written OR reading in literacy?

are there resources that we can provide to families to help their child(ren) build on their English writing / speaking?

how do we build on this if the student's parent(s) have limited English knowledge too?
